

LOCKDOWN CHALLENGE

PROTECT THE EGG

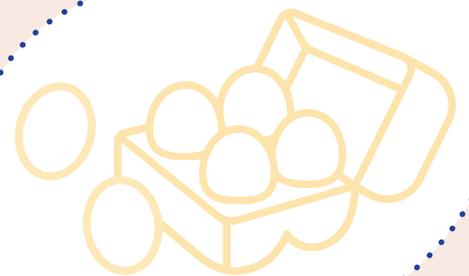

It's time to **challenge your brains** whilst at home!

Just like the penguins and parrots at SEA LIFE Sydney Aquarium and WILD LIFE Sydney Zoo we want you to try and protect an egg.

Using materials from around your house, **build different contraptions to protect your raw egg from cracking** after being dropped from a height.

Top tips

- ▶ **Research different ways** animals protect their eggs in nature – this might help you build your contraption.
- ▶ **Parachutes help people** have a **soft landing** when jumping out of planes – will this work for your egg?
- ▶ **Make a few different contraptions** so you can find out which one works best.
- ▶ **Make sure your parents know** you are about to drop some of their eggs (you want to make sure they have some spare)
